

## Extended Label

### Dual Action Soybean Inoculant

A sterilized liquid carrier containing a minimum of  $4 \times 10^9$  viable *Bradyrhizobium japonicum* and  $2 \times 10^7$  viable *Delftia acidovorans* per ml.

For on seed treatment

READ ALL DIRECTIONS BEFORE USING THIS PRODUCT

#### Application Rate

71 ml per 45.4 kg of seed (2.4 fl oz per 100 lb of seed)

#### Package Sizes Available

- 14.2 L (480 fl oz) - treats 20,000 pounds of soybean seed
- 7.1 L (240 fl oz) - treats 10,000 pounds of soybean seed
- 1.77 L (60 fl oz) - 4 bladders per case, each bladder treats 2,500 pounds of soybean seed

#### Application Method

- Ensure seed treatment equipment has been properly calibrated.
- Shake well to achieve uniform suspension of the product. Bacterial settling is normal.
- Apply 71 ml (2.4 fl oz) of BioBoost+ Enhanced per 45.4 kg (100 lb) of seed.
- Protect BioBoost+ Enhanced inoculated seed from direct sunlight or hot, drying winds.
- Plant inoculated seed within 30 days on bare seed for best results.
- Over-application of BioBoost+ Enhanced could cause lodging or bridging of the seed in the planter box.
- Gently stir seed before planting to permit airflow and to prevent seed clumping.
- In fields with no recent history of soybean production (less than 3 years), the use of an in-furrow *Bradyrhizobium japonicum* inoculant in addition to BioBoost+ Enhanced is recommended. Consult your agricultural inputs supplier for recommendations specific to your farm.

- Some seed treatments may be harmful to the inoculants. A compatibility test should be conducted prior to use with other seed treatments.
- Do not mix with caustic fertilizers or pesticides.

#### How it Works

The active ingredients in BioBoost+ Enhanced for soybeans are *Delftia acidovorans* and *Bradyrhizobium japonicum*. *Bradyrhizobium japonicum* is known to nodulate soybean roots and fix atmospheric nitrogen in a symbiotic relationship with the soybean plant. *Delftia acidovorans* is a plant growth promoting rhizobacteria known to enhance plant growth and yield.

#### Storage and Handling Recommendations

The active ingredients in BioBoost+ Enhanced are living microorganisms and require specific storage conditions to ensure viability and product performance.

- Do not store product in areas where freezing will occur, or where temperature will exceed 22°C/72°F.
- Store inoculants in a cool, dry place out of direct sunlight and wind.
- Use before expiration date stated on the package. The expiry date is valid only for unopened bags stored under cool conditions (<22°C/72°F).
- Open package only when ready to use. Once open, use the entire package.
- Do not store opened bags of BioBoost+ Enhanced.
- Unused BioBoost+ Enhanced should be disposed of in accordance with applicable federal, provincial or state, and municipal laws and regulatory guidelines.

## Precautions

The active ingredients in BioBoost+ Enhanced are naturally occurring *Delftia acidovorans* and *Bradyrhizobium japonicum* cells. Persons allergic to bacteria should avoid using this product. If use by an allergic person is unavoidable, prevent the possibility of absorption by eye or skin contact, inhalation, or ingestion to minimize the possibility of an allergic reaction. Standard protective clothing and equipment including gloves, safety goggles and respirator are recommended while handling the product. Do not wear contact lenses while handling the product.

In case of contact with skin or eyes, immediately flush exposed areas with a continuous gentle stream of clean water. Seek medical attention if discomfort or irritation develops. Medical treatment should be based on the judgment of the physician in response to reactions of the patient.

## Accidental Release

Spilled liquid may be slippery. Flush spill area with adequate water to wash away slippery residues. In case of large spill, shut off release if safe to do so. Contain spill and clean up the material for disposal.

## Limited Warranty

Danstar Ferment AG / LALLEMAND PLANT CARE ("Danstar") warrants that this inoculant (the "Product"), will contain the minimum number of live cells per milliliter/gram as specified on the Product label at the time the Product is first sold by Danstar. Danstar makes no warranty as to the Product's viability or performance since the storage, use and application of the Product and growing condition are beyond the control of Danstar.

To the extent permitted by applicable law, Danstar makes no other warranties of any kind and hereby disclaims all other warranties, whether oral or written, express or implied, including without limitation, the implied warranties of the merchantability and fitness for a particular purpose and the warranty of non-infringement. Buyer of the Product assumes the risk to persons and real or personal property arising from the use, application or handling of the Product or seeds treated with the Product.

Buyer's exclusive remedy for any and all losses, injury or damages resulting from a breach of this Limited Warranty shall be, at the election of Danstar, either the price paid by buyer for the Product purchased directly from Danstar, or the replacement of such quantity of the Product. Danstar shall not be responsible for any liabilities, damages, expenses, costs or other losses, including without limitation, loss of profits suffered in connection with the use of the Product and in no event shall Danstar be liable for any incidental, consequential, special or punitive damages to the buyer or any third party.

Buyers of the Product are deemed to have accepted the terms of this Limited Warranty upon opening the container containing the Product, requesting the Product to be applied to the seed, or use of seed to which the Product has been applied, whichever is earlier. The terms of this Limited Warranty may not be varied by any oral or written agreement.

BioBoost® uses patented technology and is a registered trademark of Lallemand Plant Care.

Not a plant food product.

Not recommended for use as a fertilizer substitute.
